Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Klein '740.

There is disclosed in Klein a cartridge 11 containing one or more beverage ingredients 13 and being formed from substantially air and water impermeable materials, the cartridge comprising: an outer member 14 defining a storage chamber, having an open upper end and a closed lower end; a lid 12 sealing the open end; a central conical member or inner member (load bearing member) extending between the upper and lower ends; a discharge spout 31 (figure 7) or aperture (figures 1 and 2) associated with the inner member, forming an outlet for a beverage; and a filter 15 joined to the inner and outer members. (See US Pat# 4,452,130 for more details of filter cartridge)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-9 and 11-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Klein '740 in view of Knodt et al.

Knodt discloses the construction of a filter cartridge, having inner and outer members, from two separate components.

It would have been obvious to one skilled in the art to construct the cartridge of Klein from two separate members as disclosed in Knodt, to provide an alternative construction method as opposed to a single piece arrangement.

In regards to the compressive load of which the inner member can withstand, such is an obvious matter of design choice which would be dependent upon the type of use (beverage maker) desired for the cartridge.

It should be noted that it has been held that where the general conditions of a claim are disclosed in the prior art, discovering optimum or workable ranges as well as an optimum value of a result effective variable involves only routine skill in the art.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Rodth and Klein '130 are cited for their disclosure of the state of the art.
